

Healy Frequently Asked Questions

1: How does the Healy device support your health and wellness?

The Microcurrent which you receive with each program acts at the cellular level to increase ATP (energy) production in the Mitochondria and Protein synthesis in the Ribosomes. It also improves communication across the cell membrane by increasing cell voltage potential. (Cheng N., Van Hoof, H., et al., (1982). The Effects of Electric Currents on ATP Generation, Protein Synthesis, and Membrane Transport)

Next, the frequencies delivered within the microcurrent by your Healy: Frequencies work in the same way that Homeopathic remedies work – by Resonance. Equal and opposite waves cancel each other out. There MUST be a near-perfect match between the resonant frequency of the issue and the resonant frequency being applied. Frequencies are used by your Healy to target problems on all levels – physical, emotional and mental. That’s why we use a wide range – 0.5Hz to 10MHz.

Thirdly Healy contains a Quantum Sensor which conducts an Information Field Analysis in the Bioenergetic Field during every program that you run. This analysis achieves 2 things: a) It shows which frequencies from the current database are most relevant for you right now and b) it helps to re-establish a healthy connection between the organs and the Information Field. This is a crucial connection for healthy living and it is one which gets distorted or lost as we suffer trauma, stress, infection etc. The cells cope as best they can while the integrity of the whole is compromised. Information Field medicine seeks to re-establish coherent communication between the body and the Morphogenic Field in which we exist and which exists within us.

2. Is Healy’s protection frequency capable of negating the harmful effect of 5G radiation? How does it do that?

A: You cannot eliminate the 5G radiation source. You can change the physical attitude of the body by strengthening the immune system and your cells. There are “protection programs” in the Healy by protecting system or programming your body against 5G radiation.

3. Is it possible to overdose with a particular frequency if used for too long? Why yes and why not?

A: No. There is no known contraindication as such. There is a contraindication to pacemakers, pregnancy, epilepsy. (To see a complete list scroll down under disclaimers).

4. Practitioners work with lots of patients with heavy metals toxicities, and we run many detox protocols, how effective is Healy frequency in eliminating these heavy metals?

A: There are certain pre-installed programs to support detoxing organs: kidney, liver lungs, and so on. In the Gold Cycle, there is a “Pure Cycle” that is very supportive if you have a detox running for a client. You can run certain meridian stimulation that you can use that’s pre-installed into the Healy device. Do all of this in tandem with nutrition, breathing, exercise as a holistic approach.

5. We understand that diseases are caused by bioregulatory imbalances where over-acidity and mineral deficiencies are major contributors. Does Healy address these issues? If it does, how does it work?

A: Yes, that’s true. Healy is bringing back the cell to its normal cell membrane voltage. An increase of cell membrane voltage is usually the basis for acidity in the body (-20 mV). Healy hopes to reverse it and bring it to -70 mV. Because of this the cell can properly function and communicate in the environment. Healy brings the cell back to balance.

6. How does Healy frequency treat infection?

A: They are infection programs. And there are certain protocols and treatments.

7. Who developed Healy?

A: Healy is a high-quality medical technology product that was entirely developed in Germany by Marcus Schmieke. Marcus Schmieke, who was born in 1966 is the inventor and developer of Healy and TimeWaver products. He has figured out a way to make everyone benefit from the possibilities of TimeWaver technology in a compact and simple form for many years. He utilizes equipment that everyone can use every day. A device that is compact, simple, and practical. Small companion devices that help our holistic health. And can help prevent and support us like never before.

Nuno Nina is a Portuguese researcher and doctor. He opened seven private clinics. Mainly in Portugal, he mainly works in integrated medicine and cell biology. Nuno’s vast amount of patient experience has enabled him to combine theories and discoveries into what is known as “Gold Sound Wave” of 144,000 sound waves When he introduced to TimeWaver technology

many years ago He recommends combining this technology with the potential of sound therapy to create something great.

A seasoned team of developers and engineers, who had extensive previous experience working on the professional TimeWaver systems, faced the exciting challenge of bringing this complex technology into a compact and easy-to-use form.

The development of Healy, the testing and preparatory work for its clearance as a medical device consumed considerably more money, time and resources than all the TimeWaver devices that came before it.

8. Does Healy Advisor have a program to detect specific food intolerance?

A: No, that is not part of Healy. That is a part of TimeWaver.

9. In regards to digestive problems, does the scanner identify exactly what the problem is, such as lack of stomach acid, or enzymes? Or bacteria infection?

A: No, also not. You can only do this with the professional system, TimeWaver.

10. When treating a patient remotely, is the treatment result exactly the same as they are right in front of you?

A: Using the Healy Resonance app you can work remotely. The distance between a and b, according to quantum entanglement, does not matter- it's secondary. If you work on the level of quantum entanglement, then between a and b can be no distance or a large distance. There is no difference. Quantum entanglement takes place regardless of the space dimension between point a and b.

11. In your opinion, can digital nutrient effectively replace physical nutrition?

A: It is a different approach. You cannot really compare. It is like comparing allopathic (modern, western) pain killer with a homeopathic pain killer. The effect is not the same. They work on different levels, and therefore they have different effects. Also the time in which the effect takes place is different using different approaches. Therefore one has to experiment a little bit. If you have a physical nutrition supplement, it works on a physical level. If you have a frequency which is a relevant frequency representing that nutrition, Vitamin C, it works differently. You're creating an environment where the cells in the body can assimilate Vitamin C more effectively. You create an environment where your nutrients can better assimilate in your body. It's not that you're physically adding Vitamin C, but if you use the program you're creating an environment to better assimilate the Vitamin C and other foods. It's a different approach. It's like comparing bananas and apples. They are both fruits, but they have different effects and tastes.

12. Can Healy frequency effectively transform and purify tap water into clean water?

A: There is no known research or studies in this regard. However, it's recommended to use alkaline water as an addition for microcurrent treatments. The more hydrated you are the more conducive you will be allowing the Healy's frequency effect to have a greater impact on the cells and organs.

13. Can Healy be compared to a TENS unit?

A: FSM is the section Healy fits under in the electrotherapy picture. FSM and Healy are micro-amps vs. a TENS unit which is milli-amps! Dr. Caroline McMakin explains that 50 to 500 micro amps increases ATP production up to 500%. From 500 to 1000 micro amps ATP levels off and anything over 1000 micro amps ATP production drops in the cells instead of going up! And that's why Healy, micro-current or micro amps has a positive cellular affect but tens units while they temporarily relieve pain they have a negative cellular affect from an ATP perspective!

14. What can Healy help out with?

A: See below, And much more ... from fitness, beauty, skin, local stimulation, bioenergetic balance, protection programs, sleep, mental balance, learning, job, gold cycle, meridians, chakras, The Healy has you covered.

Achilles tendonitis	Chronic fracture and bone pain	Golfer's elbow
Acute (sudden) and chronic (long-term) musculoskeletal injuries	Complex Regional Pain Syndrome (CRPS)	Gout
Acute and chronic neuropathic (nerve) pain	Concussion	Headaches
Abdominal adhesions	Contracture	Herpes
Adhesions	Dental pain	Interstitial Cystitis
Scar Tissue	Diabetic Neuropathy	Immune / Autoimmune issues
Apophysitis	Disc injuries	Irritable Bowel Syndrome
Asthma	Discogenic- and facet-based pain	IT Band Syndrome
Bell's palsy	Dislocations	Jaw pain
Benign prostate hypertrophy (BPH)	Emotional issues	Kidney stone pain
Bronchitis	Endometriosis	Lateral or Medial Epicondylitis
Burns	Fibromyalgia from spine trauma	Low back Pain
Carpal tunnel syndrome	Fractures	Liver inflammation
Chondromalacia Patella	Frozen Shoulder	Lymphedema
	Goiter	Migraine headaches
		Muscle pain
		Myofascial pain

Trigger points
Neck pain
Neuromas (overgrowth
and scarring to a nerve
after an injury)
Neuromuscular pain and
inflammation
Osgood-Schlatter's
Disease
Patellofemoral Syndrome
Plantar fasciitis (pain in
the heel and foot)
Post-stroke thalamic pain
syndrome
Post-concussion
symptoms
Post-surgical pain
Post Traumatic Stress
Disorder (PTSD)
Pre-surgical pain and
stiffness
Reflex Sympathetic
Dystrophy (RSD)
Runner's knee
Scar tissue
Sciatica
Shingles
Shin Splints
Shoulder pain
Sinusitis
Spinal disc pain
Sports injuries
Sprains/strains
Surgery recovery
Temporomandibular joint
pain (TMJD)
Tendinopathy
(inflammation and/or
swelling of the tendon
Tendon and ligament
injury
Tension headaches
Tennis elbow

Thoracic outlet syndrome
Torticollis (the head is
tilted to one side)
Viscerally-referred pain
Whiplash
Wound healing
